

potting mix

An unfinished farm table and a chain-link gate team up to create a custom potting bench.

good idea!

SHOPGIRL LESLIE SEGRETE BUILDS A HANDY POTTING BENCH.

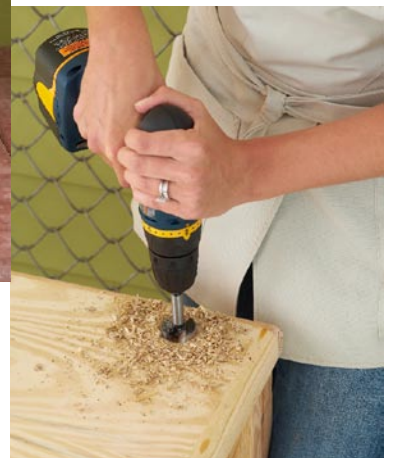

1. **ASSEMBLE** the table. Paint it and the galvanized gate.

2. **MATCH** the center of the gate to the tabletop; mark the center of each gate post $1\frac{1}{2}$ inches from the table's back edge. Using a $1\frac{3}{8}$ -inch Forstner bit, below, drill holes the depth of the bit. Place posts in holes.

3. **ATTACH** four evenly spaced $1\frac{1}{4}$ -inch pipe clamps to the gate's bottom bar; screw clamps to the tabletop. On the gate front, hammer large staples around the chain link and into the tabletop.

4. **HANG** tools from the gate using wire or S-hooks. 🌱
